

Kickball Setup

NOTES

Set-up: The first team to arrive will begin to set up the field as shown, but will require the cones of the other team as well.

Bases: Because grass infields are used for Kickball, players need to be flexible when setting up the bases (players may have to set the bases down beyond where the existing base areas are in order to achieve 65' base lines or to avoid uneven areas.)

Safety Bag: The Safety Bag will be placed 6 inches from 1st base.

Grounders: Grounders within the kickers box that travel through the shaded area and remain in fair territory are fair. 

Dotted Lines: Indicate imaginary lines in the diagram. - - - -
